Professional Summary

Experienced Laravel Developer with a strong background in building and maintaining modular monolithic architectures. Expert in leveraging the latest PHP and Laravel versions to deliver high-performance, scalable web applications. Adept at utilizing the full Laravel ecosystem, including Sentry, Telescope, Socialite, Pint, Sail and more, to create dynamic, efficient solutions tailored to meet diverse business needs.

Core Competencies

- **Laravel Ecosystem:** Sail, Pint, Sentry, Telescope;

- **Frontend Technologies:** Web Components, htmx, TailwindCSS, React. Js, Next.js, Vue.js, Vite;

- **Server Management:** Docker, Laravel Sail, Nginx;

- **Databases:** MySQL 8, Redis (Pub/Sub, Cache, Queue Driver), Postgresql, MSSQL;

- **Testing & Quality Assurance:** PHPUnit

- **CI/CD Pipelines:** GitHub Actions, Deployer, Bash scripting

- **Code Quality Tools:** PHPCS, PHP_CS_Fixer;

- **Third-Party Integrations:** Stripe, PayPal, Github;

- **Cloud Platforms:** AWS, GCP, DigitalOcean;

- **APM & Monitoring:** Sentry, Telescope.

Professional Experience

Middle Laravel Developer(Full time)

Doutor-ie | Florianopolis, SC – Brazil | Jan-2024

- Development of applications in modular monolithic architecture;
- Planning implementations alongside the business strategy department;
- Development and maintenance of unit and integration tests to ensure functionality.

Middle Laravel Developer(Freelancer)

C.I.E.F Worldwide SDN BHD | Kuala Lumpur, KL | APR-2023

- Code development focusing on single responsibility and repository pattern;
- Since this was a context with several developers, it was important that each class developed/used acted with total independence, thus the work was done on several layers;
- Use of DTOs for data persistence, in the doctrine model.

Junior Laravel Developer(Freelancer)

BH Software | Belo Horizonte, Brazil | Jun-2022

- Development of features using blade template;
- Use of Bootstrap, Jquery and ES6 in the construction of templates and consumption of API;
- Delivery of demands in very limited deadlines.

Junior Laravel Developer(Full time)

AI Desenvolvimento | Belo Horizonte, Brazil | APR-2021

- Development of APIs with different contexts.
- Migration of APIs previously developed in the CodeIgniter framework to Laravel.
- Maintenance of e-commerces and creation of apps using Bootstrap and React.

Technical Skills

- **Languages:** PHP, JavaScript, Typescript, SQL;

- **Frameworks & Libraries:** Laravel, Vue.js, React.js, TailwindCSS, Bootstrap;

- **Tools & Platforms:** Docker, Sail, Github;

- **Databases:** MySQL, Postgresql, MsSQL, Redis;

- **Cloud Services:** AWS, DigitalOcean.

Showcase & Contribuitions

- Creation of a template for a delivery service (following Designer guidelines)
  skills: Next.js, Tailwind Css
  url: https://delivery-premium.vercel.app/

- Creation of an app for consuming an API aimed at the financial market.
  skills: PHP (Laravel), integration and unit tests, mocks.
  url: https://github.com/CleisonFreitas/coin-bank.git

- Creation of a package for cascading model removal. This project was developed in response to a need to delete related records in cascade, avoiding creating new migrations that would alter the database structure.
- skills: PHP(Laravel)
